Projects (personal)

Library Project:

[Live Demo](#) | [Github Link](#)

Created a fully functional library ecommerce store

- Developed a fully functional e-commerce library store using React Router for dynamic navigation, implementing comprehensive product sorting and an automatically updating shopping cart, enhancing user experience and streamlining transactions.

Search API Project:

[Live Demo](#) | [Github Link](#)

Created a fully functional search platform for movies

- Engineered and integrated a movie search API with a fully responsive design, including robust loading states and dynamic routing. This platform efficiently showcases movies for mass search queries and individual film details, significantly improving content accessibility and user interaction
